## **D3doverrider Download Windows 7 64 Bit**

This is all for Windows 7 64-bit, so I can't speak for Windows 8.1. Issue 1: D3DOverride thinks my refresh rate is 10 less than it is (75). Absolutely not... Problem 2: Setting problem. Windows 7 doesn't allow you to install a lower one, not the higher one it installs. I could of course downgrade it if it was Windows 10 Pro, but that's not my decision. I can't run the application I've developed so far not on a version of Windows that will work with Windows 8.1. D3DOverride thinks I should be using this "unavailable" API, and I'm pretty sure it's using the wrong method.
