Mondrian Torrent (Activation Code) For PC

Mondrian is an advanced and powerful suite of advanced tools that enables the user to explore and interact with data from any source. While this application can be used to visualize virtually any kind of data, the fields for entering categorical values and geographical information can be very daunting for the novice user. Using Mondrian, one can do just about anything with data. Mondrian uses the familiar open source tools of GNUPlot, R, and the open-source Mondrian Java™ Client infrastructure. It is suitable for, but not limited to, exploration of almost any kind of data, including data from most Oracle, SQL Server and MySQL databases, as well as from most file-based systems. Mondrian is currently available for Windows, Macintosh, Linux, Unix and Solaris x86. Support for Windows, MacOSX and Linux distributions is based on Java SE 1.3.1, and Sun Studio 10.2. Support for UNIX and Solaris is based on Java SE 1.3.1, and Sun Studio 10.1. As soon as the Java SE version 1.3.1 is released, Mondrian will be officially supported for Windows, MacOSX and Linux. Mondrian utilizes a vast array of interactive visualization features, including bar charts, box plots, parallel coordinates, SPLOMs, multiple maps, mosaics, scatterplots, and many other tools. All the plots in Mondrian are fully linked, and offer many interactions and queries. Any case selected in a plot is highlighted in all other plots. Any data source is supported, as long as the data can be exported as tab-delimited text file (which is the standard data format used by most spreadsheets, R, and some databases). Any visualization can be created inside a workspace, a scene, or another plot. Currently implemented workspaces include workspaces for Microsoft Excel (for data exported from Microsoft Workspaces, Microsoft Access (for data exported from Microsoft Access), and R (for data exported from R). Mondrian Description: Mondrian is a robust R and Java application which allows users to explore and interact with data of almost any kind, including Categorical Data, Geographical Data, LARGE Data and Time Series. It can also visualize almost any kind of plot, and has many interactive visualization features, including the ability to create the most common and innovative graphs and
