Extensibility AutoCAD Crack Mac supports AutoLISP, Visual LISP, VBA, .NET and ObjectARX. AutoLISP allows developers to create extensions to the software. Automating custom commands that are not found in the interface or have undocumented parameters can be done through AutoLISP. Visual LISP can be used to make AutoCAD user interfaces more intuitive to understand by the user. It is basically a graphical programming language. Visual Basic for Applications (VBA) allows developers to write scripts that automate almost every aspect of AutoCAD. .NET is a Microsoft standard programming language for building applications for the Microsoft Windows platform. ObjectARX is a C++ class library which is the base for creating extensions. Programming languages AutoCAD's programming languages are AutoLISP, Visual LISP, VBA, .NET, C# and

ObjectARX. AutoLISP is an interpreted scripting language for AutoCAD that allows users to create custom commands. The language is an extension to the AutoCAD development language and is similar to Pascal. Visual LISP is a visual programming language and an extension of the AutoCAD development language. The language is similar to Java and Visual Basic for Applications (VBA). Visual Basic for Applications (VBA) is a Microsoft standard programming language for building applications for the Microsoft Windows platform. .NET is a Microsoft standard programming language for building applications for the Microsoft Windows platform. C# is a Microsoft standard programming language for building applications for the Microsoft.NET platform. It is based on C++ and requires the use of Visual Studio and the .NET framework. ObjectARX is a C++ class library that is the base for creating extensions. An alternative AutoCAD scripting language, is Python which is also an interpreted scripting language. Database support Database management systems: AutoCAD supports the following database systems for storing information in the program: Applications AutoCAD includes a host of AutoLISP applications that can be used by artists, engineers, and other people. There are many AutoCAD add-on products that include AutoLISP applications for use in an AutoCAD environment. For example, the Web applications Autodesk BIM 360 (formerly Autodesk Revit 360), Autodesk Enterprise Architect, Autodesk Discovery, Autodesk Architectural Desktop, Autodesk EcoDesign
