What's New In?

Add security to your drawings by applying layers and styles and adding your own comments. You can even create your own custom styles to protect your documents from being copied. (video: 4:38 min.) Publish Design Assets for Publication. Publish drawings to a variety of file formats so that you can access them regardless of what your design tools are. (video: 1:34 min.) Polar Bear: With the new Polar Bear workbench in AutoCAD, you can create large, complex drawings on a single page. You can also open and save a drawing in the same page as a preset drawing. (video: 1:15 min.) Polar Bear workbench lets you easily compare drawings with photos, imported 3D models, and many other types of information. You can now see a photo that you've

imported into a drawing, and change it in real time. With the new Text Editor you can also modify the text on imported images. (video: 2:02 min.) DraftSight: DraftSight will now work with the New Windows 10 devices (i.e., Surface Book, Surface Studio, Surface Laptop, Surface Neo, Surface Go, Surface Pro 6, Surface Pro 5, Surface 3, Surface Pro 4, Surface Pro 3, Surface 2). It will also work with New Windows devices (i.e., Surface Pro 6, Surface Pro 5, Surface 3, Surface Pro 4, Surface 2) that will be released in the future. (video: 1:22 min.) Fluent Design: Add paths to your model using text, bezier, and B-spline curves. These curves are defined in a variety of different ways, including, but not limited to, the following: Create one path by adding text Attach one path to another path Snap to a path Connect one path to another path Use a template to snap to a path Create multiple connected curves Control the quality and smoothness of the curves, including creating a freehand curve Add circles to your drawing Import any SVG file format Add a set of nested ring, arc, elliptical, circle, and ellipse curves Use an offset to create curved areas Use the Bulge feature to make any area curvy Use the B-Spline feature to create splines of any degree
