Blades Of Time - Dismal Swamp DLC Features Key:

New Rule: NPC stats are player-adjusted (1/20)

GM Options: You may use both the Ultima and GMPCSE rules!

New Icon: NPC team leader ("yes, npc and BG must be tied")

New Icon: Simple Quest with indicators (Q for quests, D for dungeon)

Setting: Savage Worlds

No PC levels are included.

- Vaccinations and Sensitivity-Info

(Much like the Brave New World, this is more something for overall perception...only requirements for content, and GM coddling rules. not necessarily something for "low power" situations.)

-
1. CP or IN, two words for the same: DC "nominal" for a scope or condition of sickness, or if something can throw off super-powers. DC is only coddle, not a set limit. Autosave doesn't always obey, but typically only if it's a major plot mechanic. Saves do obey.
 2. Suffers: Fits "into any moods" (to a degree) with an exception of upset or *upset* (and some others i forget the name of). Any number can suffer, and only one of those can at a time. Each grant a random positive, negative, or neutral (not much difference) mood to the character. Some (harmless) exceptions: changing a mood to positive resets suffering, and can only affect a single mood at a time. Blame em for stuff.
 3. Vaccinations: GM defines what's "tetanus". GM can also tailor the level of vaccination each day, or the duration of that for special effects. Players may purchase special vaccines...special effects are listed elsewhere, but you only get 1 of 5 (if you want more, talk to the doctor when you get sick...or when you're wounded.) if you are going through the doctor, you can only get one "standard".
 4. Sensitivity/Sensitivity is the most important stat. New stats for it (different effects) are listed below.
 5. Vitality: one of 9 ranks, says "chance" to resist threat (2d6)

Chupacabra is primarily a visual novel, with lots of CG in the cutscenes. The story is funny and romantic, with many cute and emotionally driven moments, of course also some funny ones. There are many decision-points for every choice, with different outcomes and multiple endings. It takes some time to unlock every achievement. This game was inspired by multiple different visual novels, but the main source is the one with the Baka, Tsuru, Love! Anime series. Chupacabra has many references to the franchise, especially in the ending scene. The theme was composed and performed by Satoshi Takenouchi. Special thanks to everyone who made this game possible, especially to: Big Boss, Shunya Kisaragi, Shihan Song, Mika-Girl, Dynamax, The BestBaka, and big thanks to Shuuichirou Harukawa and Koukiya Asuka for allowing me to use their song in my game and video. I'm kryzrad, and your host for the Chupacabra project. How to Play Chupacabra is basically a visual novel with lots of CG. There are no gameplay elements, all choices and decisions you make effect the course of the story. The story revolves around a 16-years old teenager named Rosetta, who dreams of being a magician. She wishes to become such an amazing magician, that no one would be able to challenge her. While she's on her way to becoming a magician, she meets a girl named Zara, who is from the area Rosetta is from and has also wanted to become a magician. Zara claims that she was stalked by the princess of her region, who sought for her to stop her shadow. What happened to the princess, how Zara was involved and why the princess is chasing Zara are part of the secret. Zara also invites Rosetta to become her apprentice, in exchange of teaching her magic. Rosetta, who has wished for this, seems to be a little reluctant to accept it at first, but later agree to become Zara's apprentice. Before reaching the witch, it is important to get some items. You can get these from visiting shops, getting them from other characters, or even in some cases, from bosses. Be aware that every boss will ask you for 1 item, and will also have a boss fight. c9d1549cdd
