* "To create a small but wonderful word-puzzle with a poetic beginning, to drive home the idea of bears, and to show its characters in an amusing way is an example of great creative work." - Choice of Games "I played this at my local game store, and it's an absolute must have. It's fantastic and very fun for those who love word puzzles. A word puzzle is a puzzle that takes what would typically be one big block of letters and rearranges them into a coherent sentence. It really can feel like you're using your brain when you're playing word puzzles. No other game I've played has seemed quite as much fun as a word puzzle." - Gamezebo "Wordplay is one of the games where the old skill of "learning the vocabulary" translates into real world gaming. This is a great puzzle game." - Google Play "A charming word-

puzzle with a bear theme.” - Pocket Gamer “Clever word puzzles with gorgeous art and humor.” - Big Huge Games In Alphabear, you spell words by selecting letters on a grid. When you use letters that are adjacent to each other, bears appear! The more letters you use, the bigger the bear gets, and the more points you earn! When your score is high enough, you'll also win a bear for your permanent collection. These bears can be used as powerups in future games! They increase the points you earn, extend your timer, increase or decrease the frequency with which letters appear on the game board, and more. And your bears "learn" from the words you use in-game and will repeat them back to you in unexpectedly witty and horrible ways. ;-) The original version of Alphabear has been downloaded over four million times and has won numerous awards, including Google's "Best Indie" award in 2016. This updated version of Alphabear has been enhanced and completely rebalanced. All free-to-play elements have been removed from the game and new features have been added, including: A real-time companion dictionary (so you can discover what your more inventive words actually mean!) A new "prestige" system for people who complete the campaign and want to replay it at a harder difficulty level. New random daily boards you can play. Alphabear is the recipient of the inaugural Google Play Award for "Best Standout Indie" in 2016, Gamezebo's best c9d1549cdd
