Deep below the Volcano of Phaestus lies the Hades Dungeon. Despite being at the bottom of the volcano, it is only minutes away from the Surface by swift Drop-Ship. The Dungeon Theme is a fast-paced, make-or-break, snowball-style battle between your faction's units and their antagonists' units. Unit Powers in the Overworld include: Building constructions such as walls, towers and harbours "Castrate" enemies so that they cannot fight back "Projectile: Yes" units can shoot missiles at enemy units "Cloning" units to gain more "Accelerate" units to run faster Faction track events such as turrets, projectiles and other buffs/debuffs Events like Bravery and Toughness boost Future Plans for War for the Overworld - Heart of Gold Expansion: The Heart of Gold project began with the release of the original War for the Overworld base game in early 2018. In this standalone expansion for players of the base game we offered a smattering of new units, spells and gameplay enhancements to the Underworld. We have continued with this project by making significant improvements and reworking a number of core gameplay systems. As part of our continued development of the game we will eventually release a second standalone expansion for War for the Overworld - Heart of Gold. This is currently scheduled for release in Q3 2020. Please note that the War for the Overworld base game is not required to play Heart of Gold. Features - War for the Overworld - Heart of Gold: Four new Campaign levels New starting units, troops, spells and upgrades New Dungeon Theme with complete customization - new wall, tile, skin and worker skins Added custom, hand-crafted Factions Deck New system for deploying player-controlled units - supporting simultaneous local and network play Improved Health Points system - no more instant death Improved unit difficulty balancing - a refactored unit combat system with more challenge Significant system tweaks to speed up gameplay and reduce lag Much improved AI which makes use of Titans and Artefacts properly Easter egg for all players War for the Overworld - Heart of Gold is free to players who own the base game. Click here to find out more! Additional information regarding all expansions - and updates to the base game will be announced on the official website and social media in due course. System

You are a vampire hunting agent embedded into the Seattle Police Department. You have been given the job of eliminating a group of rogue vampires and the reason you were chosen was simple. You're the best and your other team members are the worst. With a seemingly endless supply of resources at your disposal, you use the police and the government to your advantage to make sure your target is killed. When the vampire who you're chasing comes after you, you'll know you've got the wrong guy because he won't be making any demands to the authorities. Once the evidence is in hand, you just lock him up and move on to the next target. You have trained well and what you're doing is saving human life. Recommended Version Multiplayer : Not Rated Players : 1-2 Genre : Adventure Agency : Vampires I would be happy to review it as soon as the game is delivered to my inbox. All information and ratings can be found on the Steam store page. Thank you! Mastered from the original PS3/Xbox360, the enhanced PC version comes with updated graphics, modern controls and the ability to play online with full cross-platform play. Please note that due to licensing restraints, some of the original multiplayer features are removed from the Steam version. Gather Your Team Vampire Hunters are a select group. Because of the nature of their work, they do not socialize much with the human population. They also keep each other's nature a secret. As a result, the team is often made up of people with a wide range of social skills, both in their own lives and in the work environment. This means that in order to get a group of Vampire Hunters together, you'll need to recruit in the best manner possible. Recruiting can be a challenge, and with plenty of in-game decisions to make. The decisions are always weighted towards the benefits for the players. For example, a bad decision on whom to recruit will result in the loss of this high-value asset ("spare me"). If you want to take a break from the game and enjoy a few minutes of sleep, you have to be willing to sacrifice all your recruited assets. With that in mind, be wary of recruiting too many people into the team before you have achieved your desired goal.
