What's new:

⚡ Feeling About The first section of the main theme occurs in the beginning of the 2nd segment. The music consists of a soft piano melody which is influenced by the verse lyric and most importantly this musical passage gives us a sense of wonder. **Keywords** The theme appears again in the end of this segment along with a continuo, but with a different melody and another meaning to it. **These ideas:** 1. There's Light 2. Feeling of Wonder

The 2nd segment starts with the piercing cries as an interference. The music here is a cross between a major and minor tonic (G major and Gm). The screaming, as well as theme, is strong and dynamic. Similarly the rest of the theme is considerably cheerful, supporting this idea of a cheerful story. Aside from the chant, a major and minor theme occurs throughout the song in the form of brief riffs such as are usually present in children's songs. The infant's cries here are also energetic and strong. Despite the change of tone the children's theme carries a message of attachment and belonging. Though again we find ourselves at the beginning of the 2nd segment as we experience an incoming series of new problems. In this case the doorbell rings and the narrator's mother asks him to take care of his neighbor's baby while she runs to the grocery store. The musical idea that ties everything together and ties the story together is called a leitmotif. Even though it's used sparingly it's very important, as the main theme and leitmotif state their presence and impact in the song in the clearest way possible. As is the case with the main theme we hear this theme again as the story goes on (in a new form of song). The new version is very happy and arranged with a strong minor feeling from the strings. We see the theme as the emotional centerpiece of the song. The "Treehouse" from Woven is an incredible album. One of the best thing about this album is that not only do you get to witness the

**growth of this young, bubbling band, but you get to hear the evolution of their musical abilities. just the opposite and a whole bunch of my best buddies aren't anywhere near this level of musicianship. Although it sucks cause everyone in our group listens to Beast and seems to mix that music with their heart thru their music and it never fails to inspire us...
