Set in a world of Myth, in the Lands Between, a dark continent, Tarnished, has spread out and is rife with murder, deceit, and corruption. The great threat of this continent demands the attention of heroes to protect the Elden Ring, a legendary realm where the essence of life and death revolve. In order to fulfill this, Tarnished will need the prowess of an "Elden Lord" and a Ring of Power that is saved from the Great Kingdom. Tarnished is an action RPG in which the main character resides in the world of Myth, and is not on the surface of the world. While the main character resides in the world of Myth, you can explore and find yourself in the world of Tarnished, the urban world of Tarnished, and any area you wish. You start the game by selecting from among the four main characters, Knights, Rogues, Pyromancers, and Mages. By taking this path, the player can freely experience all types of gameplay and content. Character Creation, Matchmaking, and Customization There are 18 different classes, including Knights, Rogues, Pyromancers, and Mages. There are also a variety of skills for skills, which the player can use for Customization and Matchmaking. By combining the items and equipment selected at the time of character creation, the character's class, attribute, and skill can be changed, allowing you to freely develop your character's role-playing style. Features

- ◆ 100+ Monsters More than 100 monsters that are brand new to JRPGs! They include monsters with surprising traits and features. In addition, AI will improve the more you play, making them more fun to fight!
- ◆ World Map A "World Map" from which you can freely move between different locations. The "World Map" has 3 levels: Field, Urban, and Dungeon. The map is constantly changing depending on the season. (Example: In the summer, the cultivation and archery skills will be useful to you in battle.)
- ◆ Dungeon A Dungeon is a significant location from which you can take in the battle scene, but it is a location that is extremely difficult to reach. You can challenge and defeat enemies, with the battle scene changing as you go on.

## **Features Key:**

A New Fantasy Action RPG -New Action RPG genre that seamlessly combines two types of action games. -A vast world full of variety and excitement. -Explore the world with rich, deep immersion. -Find hidden secrets that change with each map. -Explore an epic drama in which the various thoughts of the characters intersect and take a journey through fantasy and myth.

## **An Action RPG where the Action is the element of the story**

In this fantasy action role-playing game, the player's choice directly affects how the story develops, changing the grand story in the process. As you advance in the game, you can experience an escalation of the mood.

The story even continues to unfold and change based on how you play. When you get captured by monsters, the main character will become cranky and start to distrust you. Through your choices, you will be able to upgrade the character's aura rating and be able to continue playing.

Various events can occur as the story unfolds. Enemies and allies will appear in various places. In addition, the protagonist may meet famous Elden Lords, and the feeling of accomplishment of winning against a

difficult opponent will be added to the sense of unity. When you defeat the enemy, there is even a chance of encountering other Elden Lords.

It's not uncommon for the main character to end up with a weapon as large as an Ax that can only be held by a strong man.

Q: Remapping items in a selected block in QGIS I have a series of specific blocks which are not all created equal: block A1 contains all of them, while A2 and so on contains only some of A1's blocks. Is there a way to automatically map all of A1's items in A2, and so on? It does not make much sense to manually map items A1 and A2 as a user, nor in any circumstances can I simply export the original blocks into another software since the blocks are unique. I would of course like to avoid creating a dummy layer with just A1 as layer, exporting it, and then manually deleting the dummy layer. Many thanks A: If you have a browse feature, select the area you want to work on, then Open a dialog box with your layer selected and choose Do nothing.
