Features for Business Users Typical users of AutoCAD are engineers, architects, drafters, engineers/architects, plant managers, interior designers, engineers, and artists. AutoCAD is a robust, powerful, easy-to-use tool that offers a number of key benefits for CAD users who require advanced design features and greater efficiency in creating, managing, and modifying 2D drawings and 3D models. A great deal of time can be saved when AutoCAD users are able to rely on automated, streamlined, "paperless" methods that allow them to spend more time designing and less time re-keying, filling in forms, and revising drawings. These features make AutoCAD ideal for use in a broad range of engineering, architecture, design, interior design, and modeling applications.

1. Smooth operation AutoCAD LT offers a much smoother user interface and is much more responsive. This allows users to perform many operations in the software, while using the minimum amount of time. AutoCAD LT is designed for smooth operation when working with larger files.
2. Integrated knowledge base Using AutoCAD LT's ability to access the Autodesk Technical Support website and the ability of the AutoCAD LT manual to help interpret and solve common problems quickly saves time for AutoCAD users who have encountered problems.
3. Alignment commands AutoCAD LT includes the ability to use the ALIGN command to align objects, and it supports the ability to use the ALIGN command to align any type of feature on an object (vertices, edges, etc.)
