He regularly produces comics in which complex words are replaced with picture puns. The character list includes not only the one-off characters, but also recurring characters and cameos. There is something for everyone to enjoy in this series of comics, so check it out and don't forget to follow the author on Twitter. Here is the latest comic in the series: When I feel like my softwares do not perform the way it should, I like to ask for help. It makes me and those that provide help feel good, and it helps me to learn something. One such guy is MikeShea, a web developer who I met on Twitter. We have been exchanging messages and I have found him very helpful. He knows his stuff, and he is a very nice guy. He has graciously offered to write an article about the things he has learnt from me. MikeShea's article about my library is now out of beta and ready for publishing: I have done a good deal of research on the internet and have found many instructional articles on how to make Sharepoint lists. However, I found it difficult to find tutorials that both addressed the need to dynamically add new information to a list, but also looked like they were written by a "programmer" that didn't get picked up on the nuances of Sharepoint. ... read more Having a site structure and web content creation team is a great idea, but it takes time and money. Eventually, both managers are going to want to automate some of the repeating tasks that they are performing. During our last site redesign, I took an inventory of all the previously-created lists and saved them as "template" lists that we could recycle. For each process in a one-time project, we have a list: A list of all the articles that we wished to create. Each one is a slightly different version of the same article. A list of all the news items that we wished to create. Each one is a slightly different version of the same news item

Gmail account is protected and hacker cannot hack it. Please enter the correc- t. Do you really want to delete your account? Remember what you're about to delete. I can't remember it but surely I took them out of the account as well. The following error appears in the Google server: - The requested URL could not be retrieved Please send a response. Please tell me how I can do that and remove this screen. A: As @toscho suggested to you, if the account has been compromised by a keylogger, as it sounds like it has, then try using the account recovery option at to reset the password for your account. I didn't see a title that included the name of your Gmail account, but I assumed that you were interested in your Google+ account as well. I'm not familiar with the Google+ system, and I don't know what your involvement was in this incident. If there was anything that you did wrong, I apologize to you and do not wish to be responsible for your legal ramifications. If that doesn't work, and you don't find it easy to set a new password, you might consider contacting Google about it via the webmaster tools. From Google, you can also request a new password be sent to a specific email account. [Intensity and phase dynamics of the light electric field in the interaction of stimulated Raman scattering in the resonant and non-resonant media]. Stimulated Raman scattering in the resonant and non-resonant media is studied theoretically. It is shown that the coupling of Stokes and anti-Stokes radiation and the laser action are connected with the delay and formation of a non-stationary phase and amplitude structure of the light electric field in the resonant media. The intensity of the generated radiation is close to the intensity of the incident pulse. It is shown that the delayed laser radiation in the resonant media can be used for determination of the resonant parameters of the probe molecule.Arginine vasopressin in the obese Zucker rat: body weight, diet intake and receptor interactions. The obese Zucker rat has been used to investigate the pathogenesis of obesity, the hypoventilatory syndrome and diabetes. The aim of the present study was to determine whether the relative lack of arginine vasopressin 0cc13bf012

is this possible? A: The URL you've pasted is an HTTPS URL, so you are using a secure connection. However, the telnet program appears to support only (relatively) insecure (no encryption) connections. I recommend using a different telnet client. (The specific problem you've posted might be more relevant to the Win32_OpenCommandLine tool on the Security Descriptor Viewer. However, I wouldn't be able to tell since I don't have the Windows SDK installed or installed on a system where I've ever used Win32_OpenCommandLine. I'm surprised I even

have access to Win32_OpenCommandLine.) Quantum metrics of black holes and the thermodynamics of anti-de Sitter space. The entanglement entropy of a CFT state living on the boundary of an asymptotically anti-de Sitter space has been used to study the thermodynamics of the dual CFT on the other asymptotic boundary. We show that in some cases this entropy quantifies the Planckian entropy of a black hole in that anti-de Sitter space. We also argue that this type of black hole is holographic because, while it has a finite entropy, it has no black-hole event horizon. This leads us to conjecture that the statistical thermodynamics of other asymptotically anti-de Sitter black holes with holographic duals is of this type. We also discuss this idea in the context of the strong holographic principle.Nepal: Special Rapporteur speaks to Colombo Special Rapporteur Joseph Philip Aloysius was interviewed by the Sri Lanka's Daily News. The subject of the visit is the lack of protection for the minority Tamils in Sri Lanka. According to the United Nations, one of the key objectives of the special rapporteur is to monitor and report on the compliance of the country with its obligations under the international Covenant on Civil and Political Rights and related provisions of the

Optional Protocol to the Covenant, and with human rights norms more generally. Special Rapporteur Aloysius has been assigned by the United Nations Human Rights Council since May 2007. Some of his key responsibilities have been: the promotion of human rights education, the prevention of the occurrence of atrocities and war crimes, the protection of prisoners of conscience, the promotion of tolerance and respect for human
