Who Uses AutoCAD? A study published by Popular Mechanics in 2002 indicated that 84 percent of people surveyed said they use or had used AutoCAD at some point in their lives. Since that survey, AutoCAD has become a standard tool for architects, engineers, and drafters in many industries. AutoCAD has been used primarily for architectural design. In other areas, AutoCAD is used for civil engineering, mechanical engineering, electronics, fire protection, electrical systems, electrical power distribution, and many other applications. What's New In?

Design extents can be set and retained in multiple drawings, allowing you to consistently design in the same scope when you need to keep multiple files in sync. Drawings will now accept and import a.DWG file extension for the first time. It's been rumored that AutoCAD 2019 would support the.DWG file extension, but this year it went live. AutoCAD adds a reminder option that will prompt you when it's time to update your AutoCAD drawings. Object details that are applied to more than one object now apply to all objects in the group, and they don't conflict with one another. Expanded PDF support for page numbers, transparency, links, fonts, and more. You can also place PDF objects directly on the drawings canvas. (video: 1:21 min.) The AutoCAD BIM application will automatically export and import models to and from DesignSpark PCB and Plant3D 2019. Previous New Features: Updated drawing conventions: Layers, layer sets, annotations, and grips are more intuitive and consistent. New section styles are available and can now be specified from the Design Centers. New export options, including multiple export formats, direct-to-device exports, and cloud-based cloud storage and archiving. New 3D styles are available for the direct-to-device exporting. New properties for 3D geometry; 3D objects can now be split, scaled, rotated, and mirrored. New layer support for multi-layers; you can now have up to 200 layers in your drawings. The Custom Path command is available for 2D drawings and supports variable and parametric paths. New Text tools include the Box Text tool for 3D text and AutoCorrect, a new AutoText feature that makes changes and corrections to text using an array of regular expressions. The Letterforms panel has been enhanced with shape creation tools and improved editing controls. The Drawing Optimizer feature lets you create drawings with enhanced editing performance. Project Templates have been enhanced to allow users to work directly with a folder rather than a.xcdat file. You can now use the project file to open existing drawings from a folder rather than from a.xcdat file. The Drawing Setup dialog box provides a variety of setup and
