MISSING MY BOREDOM. Call of Duty - United Offensive Crack | Planet Cracked | GameRanger. Infringement etc.Q: Annotating an avro schema of an object of the object itself I was wondering if it was possible to annotate an avro schema of an object of the object itself. Imagine you have the following schema { "type": "record", "name": "MyCustomRecord", "fields": [{ "name": "name" }, { "name": "address" }, { "name": "city", "type": "string" }, { "name": "state", "type": "string" }, { "name": "zipcode", "type": "string" }] } Is it possible to annotate this schema and create an avro schema for the MyCustomObject class that would look like this { "type": "record", "name": "MyCustomObject", "annotations": [{ "@name": "customField1", "type": "string" }, { "@name": "customField2", "type": "string" }] } A: Unfortunately, this is not possible. However, you can define a schema at the class level: { "type": "record", "name": "MyCustomObject", "fields": [{ "name": "name", "type": "string" }, { "name": "address", "type": { "name": "MyCustomRecord", "type": "record", "fields": [{ "name": "city",
