This invention relates to a ball joint assembly for a vehicle suspension, and more particularly relates to a ball joint assembly for damping torsion in a vehicle suspension. A vehicular suspension joint typically includes a kingpin, a stem and a spherical ball, all of which have an outer spherical surface. As the vehicle travels over the road, the suspension joint takes on torsional forces about its axis. These torsional forces create a torsional moment about the spherical ball, which in turn can cause the spherical ball to vibrate along a gimbal axis. This ball vibration can cause a degraded ride quality and a reduction in tire life, such as a reduction in cornering force. Therefore, to improve ride quality and tire life, many vehicles
