June 17, 2010 – This is not an ideal situation for economic returns to the farm or the environment. Leaving a field fallow degrades the soil, reducing it. This situation is not ideal for the economic return of the farm or the environment. Leaving a field fallow degrades the soil by reducing its volume and reduces the flow of water and nutrients to the field, and can ultimately lead to lower yields. This reduces the potential for crops to produce more food when you grow more of them. This reduces the cost of growing food when you grow more.

Environmental Economics An Introduction Field Pdf Downloadgolkes
